

Polydoc Loan

Product information

Polydoc Loan was designed to be used with Polydoc databases but can also be used separately. The connection with Polydoc is administrated through login onto Polydoc. A user of Polydoc Loan is therefore also counted as a user of Polydoc.

Functions	Lending, returning, reservation, waiting lists, statistics etc.
Borrowers	Internal and external borrowers.
Type of loans	Internal and external loans, circulation loans and long time loans. Loan types are given predefined times periods which can be altered. Circulation lists are easily created.
Polydoc connection	In Polydoc Loan it is possible to search Polydoc databases and also to export records from Polydoc to Polydoc Loan. A record in Polydoc can be split into several parts, for instance into volumes and copies. An automatic check is built-in to make sure a record is not exported more than once.
Other information	Records can also be registred directly in Polydoc Loan without first being imported from Polydoc.
Additional information	Records in Polydoc Loan can be supplied with information about price, type and subject.
Poly Pen	Optional module dedicated for registering loans and returnings with the help of a bar-code reader.
External hardware	Bar-code readers can be used for registering loans, both in the main module and PolyPen.

Polydoc Loan is delivered with Swedish and Norwegian texts.

Requirements: a PC with Pentium or better processor, running Windows 98 or later, having a minimum of 32 MB RAM (64 MB for Windows NT) and 20 MB free disk space.
