

Polydoc Web is used for publishing of Polydoc databases on Internet/Intranet.

### **Contents**

- HTML and ASP pages for the following functions:
  - Login and Logout
  - Selection of database
  - Presentation of field information
  - Presentation of search terms
  - Searching
  - History (query list)
  - Presentation of search result
  - Sorting the search result
  - Combining the search result with a new query
  - Ordering of one or more records
  - Statistics
- Documentation and examples
- An ActiveX control to connect a Web-session with Polydoc
- Utilities for maintaining the connection with Polydoc

Polydoc Web is delivered with English, Swedish, Danish, Finnish, and Norwegian texts.

The licensee is free to modify and extend included pages with the company's logotype, images, colours, links, own functions, presentation formats and more.

### **Requirements**

- PC running Windows NT 4 / 2000 server
- Web-server capable of handling ASP pages and ActiveX controls.  
For instance, Microsoft Internet Information Server (IIS) ver 4 or later.
- Polydoc installation. Polydoc Web uses the capacity of the Polydoc installation regarding installed modules.
